- **Git, TFS, Source-Tree** as a version control system (VCS)
- Knowledge of Architecture components like **MVVM, MVC**
- **Encryption** with RealmDB, Beginner in using GraphQL API & Capacitor- for native runtime for web apps
- API platform for using APIs – **Postman, Altair GraphQL Client**
- Experience in integrating 3rd party SDKs (Jumio Net-Verify, AppLogic, HERE maps, Social Integration etc.)
- Notification with **FCM**
- Payment Gateway – **PayPal, Braintree, Rave Payment, PayuBiz**
- Hands on experience in **LiveData, ViewModel, RxJava**, Android Jetpack,
- Unit Testing using **JUnit** to improve code quality
- Best coding guidelines, design patterns, data binding to make code loosely coupled, scalable & maintainable
- Reporting Tools: **JIRA, ZOHO, Active Collab**

EXPERIENCE

KEY RESULT AREAS:

- Conceptualizing, designing and developing various applications for android based phones, tablets
- Devising solutions for given technical specifications, installed application software, contributed to code reviews

GlobalLogic – A Hitachi Group Company, Noida – Associate Consultant

April 2021 – PRESENT

- Discussion regarding the project requirement, architecture including the data structure and flow
- New feature implementation to provide good experience to the end user
- Being in the code reviewer team, work in direction of code quality

Infogain India Pvt Ltd, Noida – Sr. Android Developer

November 2018 – April 2021

- Revamped the flow of different projects using MVVM to provide flawless experience to user
- Amendments in existing features and new feature implementation to provide good experience to the end user
- Being in the code reviewer team, work in direction of code quality

Vinove Software & Services Pvt Ltd, Noida – Android Developer

March 2016 - November 2018

- Discussion regarding the project requirement, architecture including the data structure, tables schema and flow
- Implementation of Android UI using java and SQLite/Realm as database

PROJECTS

Title – Lunexis Site Tablet App – A healthcare project: MDM application (In Progress)

Scope: Lunexis eSource a suite of solutions for capturing and integrating electronic data from sites, clinicians, and patients at its source naturally enhance your clinical trial workflow by reducing manual labour, providing anytime, anywhere data access, and saving resources as your trials progress.

Role: Understanding the requirement, Development

Title – Camera Application – SAMSUNG R&D Centre (Maintenance project)

Scope: Samsung camera lets you easily shoot photos, videos and offer beautiful filters with other different features.

Role: Understanding the requirement, Maintenance and bug fixing

Title – Flutter Store- Technology used (Flutter)

Scope: An online shopping application

Role: Understanding the requirement, Development

Play-store Link: <https://play.google.com/store/apps/details?id=com.panaceasoft.flutterstore>

Title – Knox Meeting: MDM application

Scope: A tablet based application for Samsung internal operation. User can book meeting hall, maintain it and adjust their meetings

Role: Understanding the requirement, Design, Development of functional programming

Title – SmartDost 2.0 HHP – SAMSUNG Gurgaon: MDM application

Scope: An application for Samsung HHP employees or field force. It allows the employees to access various outlets and dealer information and perform audits when they are onsite

Role: Understanding the requirement, Design, Development of functional programming & Maintenance

Title – ActivateNow

Scope: Risk management application

Role: Understanding the requirement, Design, Development of functional programming & upload to the play-store

Play-store Link: <https://play.google.com/store/apps/details?id=com.activatenow>

Title – Classmate

Scope: A note sharing application for school and college students

Role: Understanding the requirement, Design, Development of functional programming & upload to the play-store

Play-store Link: <https://play.google.com/store/apps/details?id=classmate.com.classmate>

Title – Tafoos

Scope: A food delivery application

Role: Understanding the requirement, Design, Development of functional programming & upload to the play-store

Play-store Link: <https://play.google.com/store/apps/details?id=com.tafoos>

Title – Crew Journey

Scope: Application to provide the information of air-flights

Role: Understanding the requirement, Design, Development of functional programming & upload to the play-store

Play-store Link: <https://play.google.com/store/apps/details?id=com.crewjourney>

Title – SoCITY

Scope: Application to allow Abidjan and tourists to search and find best places for their output such as nearby cafes, hotels, food products sale, public-toilets etc.

Role: Understanding the requirement, Design, Development of functional programming & upload to the play-store

Play-store Link: <https://play.google.com/store/apps/details?id=com.crewjourney>

Title – Monaco

Scope: Application to show all exhibition places, car makers and partner's showrooms, events, linked services for SIAM 2017 event in Monaco

Role: Understanding the requirement, Design, Development of functional programming & upload to the play-store

Play-store Link: <https://play.google.com/store/apps/details?id=com.manaco&hl=en>

Title – Global Driver

Scope: A driver verification application

Role: Understanding the requirement, Design, Development of functional programming & upload to the play-store

Play-store Link: <https://play.google.com/store/apps/details?id=com.globaldrivers>

EDUCATION

- **MCA** from Jagan Institute of Management Studies, GGSIP University (77%) -- Completed in July 2016
- **B.Sc (H)** in Physics from Shivaji College, University of Delhi (53%) -- Completed in May, 2012
- **12th** from Joseph & Mary Public School, C.B.S.E. (73%) -- Completed in May, 2009
- **10th** from Mount Olivet Sr. Sec. School, C.B.S.E. (71%) -- Completed in May, 2007

I hereby declare that the information furnished above is true to the best of my knowledge
